

W80 Series Computerized Color Matching Made Easy

The W80 Series offers the best equipment in color matching, the MatchRite iVue, a versatile non-contact spectro, which offers the smallest aperture size in color matching. The MatchRite iVue is revolutionary in its ability to measure almost anything, like wet paint samples, large bulky objects, and can even pick out a color in a pattern. This easy to use spectro helps increase in-store uptime, while reducing service cost and overall cost of ownership. Also included in the W80 series is the brand new ColorDesigner® PLUS, a versatile color matching software package, will allow for quick and easy color matching for customers. In addition a computer, monitor, and label printer are also available in some of the W80 packages.

W80 Series

Computerized Color Matching Made Easy

MatchRite iVue:

Versatile portable non-contact spectro allows for color matching on just about any customer sample with the smallest aperture size in color matching, the MatchRite iVue can even pick a color out of a pattern. With ColorDesigner PLUS, color matching software, the iVue is a powerful tool for servicing your customers.

- Line of Sight™ sample viewing provides fast and easy measurement on any sample, even those odd-shaped, large or bulky samples.
- Unique Active Visual Targeting™ ensures precision measurements by allowing you to target exactly the spot you want to measure. No more guess work.
- Innovative LED spectral engine delivers superior color match, especially on reds, blues and dark colors. And, the LED illumination will provide years of uninterrupted service and repeatable performance.
- Calibration once a week improves in-store uptime and improves your customer's experience.
- Measures one and a half inches from the sample surface, keeping the lenses clean and free of wet paint and reducing service costs over the life of the instrument.
- Switchable large and small measurement spot sizes with the click of a button, and no need to recalibrate between the two.
