# STAIN RESISTANT WALL PAINTS

# TESTED

We spent thousands of dollars to have a Sydney University test Durablex Everclean against all opposition stain resisting wall paints to determine which product is the best.

The university purchased the paint from random stores, so that the test could not be doctored.

The stains used were:-

- Red ink
- Blue food dye
- Hot black coffee
- Beetroot juice
- Poster paint
- Water based texta
- Red wine

1. The staining liquid was applied and allowed to dry for an entire hour on the test panels laying flat.
2. Warm water and Ajax Spray'n'wipe were then used to rinse the stains off the test panels.
3. **The results were astounding**

**Durablex Everclean won “hands down”.**

**Therefore, recommend Durablex Everclean to your customers for a true stain resistant low sheen acrylic house paint.**

P.S. The testing officer was so awed by the results, he painted his new home throughout with Durablex “Everclean”
