

DURALEX®

Premium Range

Premium Undercoat

Undercoat and Wallboard Sealer INTERIOR / EXTERIOR

Duralex® Premium Undercoat is a quick drying vinyl-acrylic suitable for interior and exterior cement render, brick, fibro, interior timber, chipboard and plasterboard under both oil-based and water-based top coats.

The most important requirement of an undercoat is its 'ENAMEL HOLD-OUT'. That means when gloss alkyd enamels are applied over it, they don't sink in and lose some of their gloss. This sinkage also contributes to an early breakdown of the top-coats. In testing Duralex® Premium Undercoat we made numerous comparisons with other brands on the market.

The results were beyond expectations. Duralex® Premium Undercoat showed higher enamel holdout than some premium oil-based undercoats and almost double that of a budget priced oil undercoat.

N.A.T.A. Laboratory confirms Duralex® claims...

Our claims have been confirmed by an independent laboratory. A certified member of the National Association of Testing Authorities. (N.A.T.A.) They found Duralex® water-based Premium Undercoat was slightly better than one of the best top name brand of oil-based undercoats and 'at least equal' to the best top-name-brand Acrylic Undercoat.

Duralex® Premium Undercoat is amongst the best undercoats on the market, be it water-based or oil-based.
