Durablex timber-STAIN

*ALL INTERIOR/EXTERIOR TIMBER

is a versatile water-based stain in a range of appealing, transparent timber colours. It can be used on all interior timber surfaces from cabinetry to floors. Formulated for no grain raise and low VOC, with a pleasant, barely there odour. It is fast drying and goes on like a traditional spirit stain but utilises 21st Century technology. Easy to apply with a brush, paint pad or soft cloth. Allow to dry before sealing or varnishing with your chosen clear.

Durablex polyurethane STAIN & VARNISH is a combined stain and clear finish designed with the convenience of a single product for ease of use. Apply to interior timber surfaces, including doors, cabinetry and floors. It has a tough durable finish, is resistant to scratches, normal household chemicals and moderate heat. It is quick drying which allows projects to be finished in a day. Available in **gloss** or **satín** finish.

Colours are indicative only

Durablex polyurethane VARNISH is a clear finish for interior and exterior timber. Suitable for doors, cabinetry and floors. The product is a tough and durable coating available in either a **gloss** or **satín** finish. It is quick drying and a project can be finished in a day with no lingering odour from our low VOC formula. Resistant to most common household chemicals, stains, moderate heat and scratches. Can be easily refinished.
