

DURALEX®

Timber Care

PRODUCT INFORMATION SHEET

dura-STRIP™

POISON

KEEP OUT OF REACH OF CHILDREN READ SAFETY DIRECTIONS BEFORE OPENING OR USING

DESCRIPTION

Duralex dura-STRIP™ is a powerful, high strength liquid remover which removes old, worn or weathered existing timber finishes, such as decking stain or oil, and prepares timber for coating. When used in combination with Duralex clean&BRIGHT™ it can also be used to avoid the weathering process and enable immediate coating of new bare timber, as dura-STRIP™ helps to draw out tannins and oils quickly and removes them from the new timber surface. Then clean&BRIGHT™ cleans the timber and prepares it for coating. Duralex dura-STRIP™ is much safer to use and gentler on the environment compared to a conventional paint stripper.

NOTE: dura-STRIP™ is not a conventional paint and varnish stripper. To remove paint and other timber coatings that are in sound condition, use a suitable paint stripper.

*** FOR BEST RESULTS: APPLY Duralex clean&BRIGHT™ AFTER Duralex dura-STRIP™.**

USES

For all EXTERIOR timber including decking, outdoor furniture, weatherboards, pergolas, window frames, trim, fences and marine timbers. NOT SUITABLE FOR INTERIOR SURFACES.

APPLICATION

CAUTION: Avoid contact with painted or metal surfaces and vegetation. May be corrosive to metals. Rinse off thoroughly if contact occurs.

1. Remove surface dirt by sweeping or washing down with water.
2. Shake dura-STRIP™ thoroughly.
3. Wet the timber surface to be cleaned with water.
4. Apply dura-STRIP™ undiluted to the timber with a stiff bristle brush, broom or spray. Clean small sections at one time. Spot cleaning should be avoided to prevent patchy results.

NOTE: Duralex dura-STRIP™ can be slippery. Use caution when walking on treated surface.

5. Leave dura-STRIP™ on the timber for 10-15minutes and if necessary, apply more dura-STRIP™ to keep timber damp throughout this period and don't allow to dry on the surface.

6. For best results dura-STRIP™ should be applied to cool surfaces, out of direct sunlight, to avoid the cleaner drying on the timber.

7. Scrub the timber vigorously with a stiff broom. Do not use a wire brush.

8. Rinse off surfaces thoroughly using maximum pressure from a garden hose or using a high pressure water cleaner. For best results a high pressure water cleaner is recommended.

IMPORTANT: Failure to thoroughly remove dura-STRIP™ may result in discolouration of the timber under clear finishes.

9. If stubborn areas remain, repeat application in those areas as per previous instructions.

10. Rinse off surfaces thoroughly, then clean timber with clean&BRIGHT™ following label instructions.

Note: After cleaning with dura-STRIP™, some species of timber may appear darker. clean&BRIGHT™ will restore brightness.

11. Allow timber to dry thoroughly before applying further products.

COVERAGE

One Litre of dura-STRIP™ will treat approximately 4-6 square metres, depending on timber porosity, species and condition.

CLEAN UP

Clean up tools with plenty of water. Spray vegetation with water if there is a chance of contamination. Rinse timber well with fresh water before allowing children and animals into area.

ENVIRONMENT

Low odour. Low V.O.C.
Environmentally friendly.

IMPORTANT

Keep out of reach of children. Keep container sealed when not in use. RISK of burns to skin and serious risk to eyes. Wear appropriate eye protection and gloves when using. Poison Information Centre (13 11 26).
